EXPERIENCE

Comcast – Philadelphia, PA

Software Engineer

June 2019 – Present

- Reduced deployment configuration time by 98% by migrating CI/CD from GoCD to Concourse.
- Rearchitected the logging pipeline to increase throughput and dramatically reduce data loss.
- Developed a messaging microservice in Spring Boot that allows over 31,000 technicians to quickly report app issues.

Lockheed Martin – Moorestown, NJ

Software Engineering Intern

June 2018 – August 2018

- Worked on an Agile team to support the development of the Aegis Combat System using Java and C++.
- Automated parts of the build process using Jenkins, Python, and Bash.
- Collaborated with a team of 6 interns to simulate a vehicle that can transport and fire a rocket at a target using MATLAB.

The College of New Jersey – Ewing, NJ

Machine Learning Student Researcher

January 2017 – December 2017

- Designed a machine learning (ML) and natural language processing (NLP) infrastructure with a team of 5 students and faculty in Python using machine learning and statistical analysis libraries such as scikit-learn, numpy, pandas, and matplotlib.
- Improved the speed of the infrastructure by 95% by adding support for parallel processing on the High Performance Cluster (HPC).

Comcast – Philadelphia, PA

Software Engineering Intern

June 2016 – August 2016

- Increased the efficiency of the Quality Assurance team by creating a Node.js application that automatically generates unit testing reports, which can be filtered by date, device type, operating system, etc.
- Collaborated with another intern to create a web application in C#, HTML, and Javascript that connects to an SQL database to retrieve customer session information.

EDUCATION

The College of New Jersey – Ewing, NJ

Bachelor of Science, Computer Science

August 2015 – May 2019

Advanced Courses: Natural Language Processing, High Performance Computing, Cryptography

Co-Founder/President: TCNJ Table Tennis Club

SKILLS

Proficient: Python, Java

Tools: Git, Concourse, Vault, Elasticsearch, Logstash, Kibana, Cloud Foundry, Docker, MongoDB, Linux/UNIX, Gradle

Libraries/Frameworks: Spring Boot, Scikit-Learn, Numpy, Tensorflow, Pandas, Matplotlib, Keras, OpenCV, Django, Flask

PROJECTS

Android Application – “arXiv Explorer”

Published an Android application with over 11,000 downloads that allows users to browse, search, and download scientific papers from arxiv.org.
